

MAINTENANCE TRAINING PROGRAM

Start your career path with **ONLY 3 WEEKS** of training!

No-cost training opportunities are available to earn an industry certification manufacturing employers seek. Upon successful completion of 3 weeks of hands-on classroom training, participants are referred to local manufacturers for employment.

INTRODUCTION TO MAINTENANCE

Students will gain a foundation knowledge in maintenance, understanding of simple mechanical components, basic knowledge of electricity and the operation and uses of a Programmable Logic Controllers (PLC) in industrial environments. Students will be introduced to basic troubleshooting tools and techniques through the use of simulations as well as hands-on activities.

The knowledge gained through this program will position participants to understand the various aspects of working in an entry-level maintenance position as well as provide the basic level knowledge to work towards a position as an entry-level maintenance technician or helper.

Eligibility requirements apply. Participants must be able to pass a background check and drug test.
